Wolman® Introduces DuraStain® Solid Color Stain

Somerset, NJ – Wolman® Wood Care Products is proud to introduce Wolman® DuraStain® Solid Color Stain, a new exterior wood stain formulated to keep decks, siding, fences and other outdoor wood looking beautiful longer.

Available in 2 tint bases that yield 22 custom colors and offer unlimited color choices by tinting with universal colorants – just two coats of DuraStain Solid provide a beautiful opaque matte finish that resists fading longer and requires less frequent maintenance than other stain types. It protects new or weathered wood from UV graying and water damage and resists peeling and blistering for 5 years on decks, 15 years on siding – backed by Wolman’s Performance Guarantee.

DuraStain Solid offers a scuff and scrape-resistant finish that withstands heavy foot traffic and furniture abrasion. Its moisture-resistant, mildew-resistant film protects against wood cracking, checking, splitting and warping, and keeps outdoor wood free of unsightly mildew stains. And its polyurethane-fortified 100% acrylic formula optimizes adhesion for a more durable, long-lasting finish.

Great for decks, porches, fences, siding, play sets, outdoor furniture – any outdoor wood where a rich opaque matte finish is desired – DuraStain Solid is self-priming, so just two coats deliver beautiful deep color pigmentation and solid hide coverage, even over previously coated, weathered wood. Its quick dry water-base formula is easy to use and offers easy soap and water clean-up.

For more information about new Wolman® DuraStain® Solid Color Stain and other Wolman products that clean, restore, beautify and protect outdoor wood, visit www.wolman.com. Or call 732-469-8100.
